PROFESSIONAL SUMMARY

Frontend Developer and UI-focused builder with 1.5+ years of experience developing scalable, responsive web applications using React, Next.js, and Tailwind CSS. Skilled in creating modern user interfaces, reusable component architectures, and AI-powered digital products with a strong focus on usability, performance, and clean design. Currently pursuing a B.Tech in CSE (AI & ML) at University of Engineering and Management while building real-world SaaS and hackathon-winning projects.

EXPERIENCE

• Meru Technosoft Private Limited

Dec 2025 – Present

Lead Frontend Developer

Ahmedabad, Gujarat · Remote

- Improved application reliability by reducing component re-renders by **35%** across a production accounting platform through migration of critical UI modules from JavaScript to TypeScript, enforcing strict prop typing and eliminating runtime errors.
- Delivered **12+** reusable and fully tested React components using Jest and React Testing Library, reducing feature development time by **40%** and enabling releases to ship two weeks faster per sprint.
- Optimized frontend performance, increasing Lighthouse scores from **71** to **94** through code-splitting, lazy loading, and bundle optimization, improving load times by **48%** for low-bandwidth users.
- Integrated **8** RESTful APIs and managed asynchronous state with Zustand, reducing data-fetch inconsistencies by **60%** while establishing frontend architecture standards adopted by four engineers.

• Meru Technosoft Private Limited

Jun 2025 – Dec 2025

Frontend Developer Intern

Ahmedabad, Gujarat · Remote

- Built **6** production-ready and responsive UI modules using React.js and Tailwind CSS, ensuring cross-browser compatibility across Chrome, Firefox, and Safari without post-launch bug reports.
- Improved debugging efficiency by **30%** by introducing React DevTools and browser rendering profiler workflows that were later adopted during full-time development cycles.
- Contributed to the integration of **4** backend REST APIs using Axios interceptors and React Context for state management, replacing three manual reporting workflows with live data synchronization.
- Collaborated with team members to maintain code quality and deliver seamless user experiences through modern frontend development practices.

• Coding Jr

Feb 2025 – May 2025

AI Researcher Intern

India · Remote

- Accelerated development workflows by reducing prototype-to-demo cycles from **5 days** to **2 days** through prompt engineering techniques with GPT and Claude APIs for component and documentation generation.
- Researched and evaluated **6** AI developer tools based on latency, code quality, and TypeScript compatibility, contributing to the team's recommended AI-assisted development stack.
- Applied AI-featured debugging techniques to resolve **14** recurring JavaScript edge-case bugs across three web projects, reducing manual debugging effort by **50%**.
- Gained hands-on experience with modern AI platforms and APIs while exploring practical applications for improving software development workflows.

SKILLS

- **Core Competencies:** Frontend Development, Component-Based Architecture, Responsive Web Design, API Integration, State Management, Performance Optimization, Troubleshooting, Prompt Engineering, Automation, Insightful
- **Tools:** GitHub, VS Code, Cursor, ChatGPT, Claude code, Firebase
- **Technologies:** React.js, Next.js, Tailwind CSS
- **Programming Languages:** JavaScript, Python, C

PROJECTS

• SmartCARE: AI Multimodal App

Jan 2026 – Apr 2026

Role: Research & Publication, Research & Ideation, Frontend Developer

Team: 5 Members

Tools: Whisper, DistilRoBERTa, FER, GPT, Hugging Face, T5, Firebase, SQLite, React, Tailwind css Figma

- Co-developed a multimodal application for mental wellness and emotional therapeutic support, integrating speech recognition, voice + facial emotion detection across 7 emotion categories, multi-modal emotion fusion, and cross-questioning conversational flows for empathetic interaction.

- Created accessibility-first UX with multilingual response generation and auto language detection for users across diverse linguistic and cultural backgrounds; **Communicated to IETE's Second International Conference on Smart Mobility Systems, 2025.**
- **CogniLens: AI Multimodal Smart Glass** Feb 2025 – Oct 2025
Role: System Architecture, Frontend Developer, 3D Model Design **Team:** 5 Members
Tools: YOLOv8, OpenAI Whisper, React, EasyOCR, MiDaS, LangChain, ChromaDB, Raspberry Pi, Figma
 - Engineered an intelligent smart glass system for elderly and visually impaired users, unifying memory assistance (medication reminders, spatio-temporal lost item retrieval, facial recognition) and adaptive navigation (obstacle detection, road guidance, flexible re-routing) into a single hands-free experience.
 - Designed an accessibility-first voice-driven UX; system achieved **0.90 precision** in object detection, **93%** accuracy in medication verification, and **90%** success rate in lost item retrieval. **Accepted & Presented at ICCDC 2025.**
- **Pocket Legal Aid - AI Legal Awareness Platform** Nov 2024 – Feb 2025
Role: System Design, Frontend Developer **Team:** 4 Members
Tools: React, Flask, Firebase, Gemini API, Hugging Face, OpenStreetMap, Tailwind CSS, Figma, Ngrok
 - Built and launched an intelligent legal assistance platform with 100+ constitutional resources and chatbot functionality, improving accessibility and user engagement.
 - Implemented contextual search using n-gram models, increasing search relevance by **40%**.
- **Marg Sarhi: S&T and R&D Coal Project Management System** Aug 2024 – Dec 2024
Role: Requirements Analysis, Frontend Developer **Team:** 5 Members
Tools: Next.js, Tailwind CSS, Pocketbase, MongoDB, Gemini, Figma
 - Engineered a centralized dashboard system for managing 100+ coal projects, incorporating user flows and data visualization to enhance decision-making efficiency by **70%**.
 - Automated reporting workflows, reducing manual effort by **80%** and improving operational efficiency.

PUBLICATIONS

- “SmartCARE: A Next-Generation Multimodal Application for Personalized Healthcare and Therapeutic Support” in *Proceedings of the International Conference on Communication Devices and Computing (ICCDC)*, 2025. **[Accepted & Presented]**
- “CogniLens: An Multimodal Smart Glass System for Memory Assistance and Adaptive Navigation in Elderly and Visually Impaired Users” in *IETE's Second International Conference on Smart Mobility Systems (ICSMS)*, 2025. **[Communicated]**

EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year of Passing
CSE (AI & ML)	University of Engineering and Management	8.11	2026

- Vice Chancellor's Award for Best Techno Wiz 2025

CERTIFICATIONS

- **LinkedIn Learning**, React.js Code Challenges Aug 2025
- **LinkedIn Learning**, Advanced Prompt Engineering Mar 2025
- **Coursera**, Code with AI Integration Jan 2025
- **Udemy**, The Complete Front-End Web Development Bootcamp Jul 2024
- **Coursera**, Collaborative Development with Git and GitHub Feb 2024

ACHIEVEMENTS

- **Vice Chancellor's Award for Best Techno Wiz 2025**, University of Engineering & Management (UEM), Kolkata
- **Winner, MLH Best AI Hack, Diversion 2K25, Kolkata**, Legal Awareness Platform with AI
- **1st Place, HackHive Hoopla 2.0 Hackathon, UEM Kolkata**, Smart Home Security System
- **SIH 2024 Finalist**, S&T and R&D Coal Project Management System

EXTRA-CURRICULAR ACTIVITIES

- **Football**, Enjoy watching football, debating match results, and discussing magical moments with other fans
